

PHAN TRAN XUAN HUY

SOFTWARE/WEB DEVELOPER

CAREER OBJECTIVE

Seeking an Intern/Fresher position to apply my knowledge of Software Engineering, particularly in backend development and UI design, to practical projects. Ultimately, my goal is to continuously enhance my system thinking and problem-solving skills to become a Full-stack Developer or System Administrator dedicated to building and optimizing comprehensive tech products.

PROFILE

- 0708 024 470
- phanhuy110305@gmail.com
- linkedin.com/in/phantranxuanhuy/
- 15 Tân Thái 6, Đà Nẵng
- github.com/uchihahuyyy

TECHNICAL SKILLS

- Languages: PHP, JavaScript, Java, Python, Dart.
- Frameworks/Libraries: Laravel, Node.js, ReactJS, Spring Boot, Flutter.
- Databases: MongoDB, MySQL (hoặc RDBMS).
- Tools & OS: Git/GitHub, Linux (CentOS), RESTful API.

SOFT SKILLS

- Problem-Solving & Debugging
- Team Collaboration
- Self-learning & Adaptability

LANGUAGE

- English: B1

WORK EXPERIENCE & OUTSTANDING PROJECTS

COWI Group | Web Developer Inter (Jun 2025 - Aug 2025)

Project: E-Commerce System

Fullstack Developer (2025)

- Full-cycle Dev:** Independently built a complete e-commerce website using PHP.
- System & APIs:** Architected the database and APIs for products, carts, and orders.
- Key Features:** Implemented multi-criteria filtering, automated checkout, and email alerts.
- QA:** Conducted manual testing to resolve UI and backend logic bugs.
- github.com/uchihahuyyy/light_novel_store

Project: Light Novel Store (Fullstack Website)

Fullstack Developer (2025 – Present)

- Technologies:** Node.js, MongoDB, ReactJS
- Full-cycle Dev:** Built a complete Light Novel e-commerce platform (Frontend & Backend).
- Database & Security:** Designed book/genre schemas and secured user login with JWT & bcrypt.
- Key Features:** Developed a real-time cart, advanced filtering, and order management system.
- github.com/uchihahuyyy/Light_Novel_Project

EDUCATION

Dong A University
Software Technology
2023-2027
GPA: 2.6/4.0 (Good)

To: Recruitment Department

Dear Hiring Manager,

My name is Phan Tran Xuan Huy. I am writing to express my interest in the **Software Engineer / Backend Developer** position at Funtap. With a background in Software Technology, I have been closely following Funtap's tech ecosystem and would greatly appreciate the opportunity to learn and grow within your engineering team.

Through my academic background and practical projects, I have built a solid foundation in system thinking, object-oriented programming, and database management (SQL Server, MongoDB), working with languages such as Java, C#, Python, and Node.js. Although I have hands-on experience in web development (gained during my internship at COWI Group using PHP/Laravel), I consider it a complementary skill. My primary focus and true passion lie in core software engineering: analyzing system requirements, designing database schemas, handling backend logic, and solving technical problems.

I am comfortable reading English technical documentation and regularly research solutions independently when encountering bugs. In my work, I try my best to write clear code and test my logic carefully to minimize errors. I understand that Funtap operates large-scale and complex systems, and I am fully prepared to put in the hard work necessary to learn new technologies and adapt quickly to your environment.

I have attached my CV, which provides further details about my software projects and skills. Thank you for your time and for considering my application. I hope to have the chance to discuss how my background and strong willingness to learn can be a good fit for Funtap.

Sincerely,

Phan Tran Xuan Huy
